

HOW TO USE THE USA CYCLING "myUSAC" APP.

Step 1: Download the app: <https://legacy.usacycling.org/mobile-apps.htm>

Step 2: Log onto the app with the same info as you would on the web browsers.

NOTE: The app is clunky and USAC rarely updates it. So what is it good for? It's good for accessing your license info and number on the fly during day-of registration. It also shows when the race promoters have turned in your race results to USAC. Most of the time it will take you to their web browsers. Below are some features of the app.

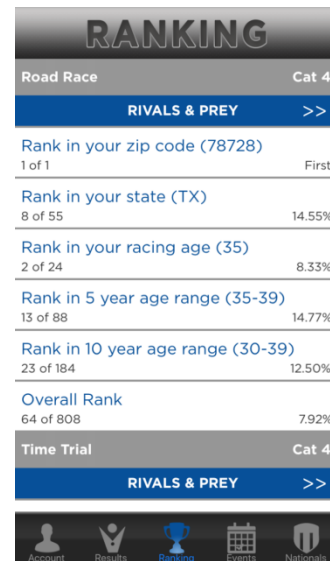

Home screen.

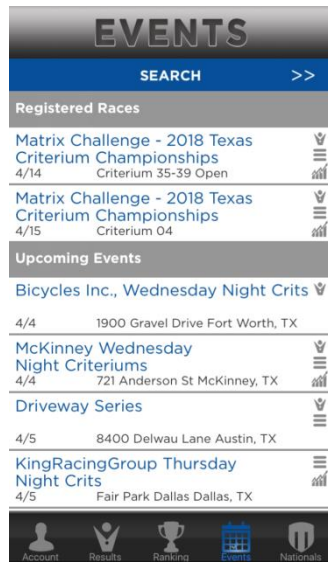

You can quickly access your license and renew when it expires.

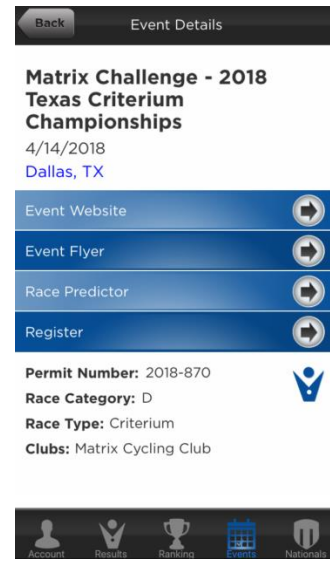

Results show race results that have been uploaded to USAC. It does not update instantaneous after a race, the time it takes for race results to be uploaded to USAC is dependent on the race promoter.

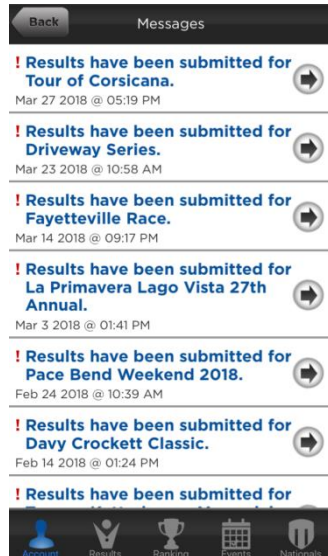

You can check out your rankings among other women by different criteria. Note: these ranking points are not the same as upgrade points.

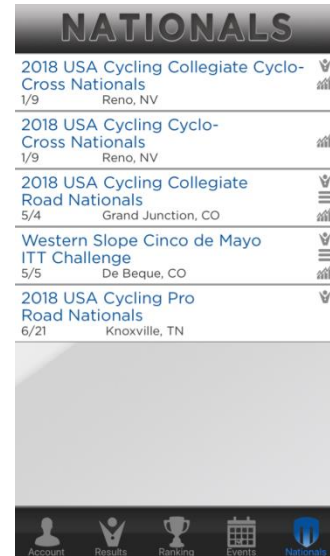

You can search for upcoming events that have registration through USAC instead of Bikereg.

Get more info about upcoming events and registration. It will take you back to the web browsers.

Messages shows results have been uploaded to USAC by the promoter.

Search for National races around the country.
